Here's a list of hobbies that align well with your background in web development, education, and general interests. Feel free to pick the ones that resonate most with you or modify them:

Creative Hobbies

1. Designing and customizing websites.

2. Learning and experimenting with new coding languages or frameworks.

3. Graphic design or digital art.

Tech-Related Hobbies

4. Building personal web or app projects.

5. Exploring cybersecurity and ethical hacking tools.

6. Participating in hackathons or coding challenges.

Educational/Professional Growth

7. Reading tech blogs or books on web development.

8. Taking online courses or tutorials on advanced programming topics.

9. Joining tech meetups or online developer communities.

Leisure and Relaxation

10. Gaming (e.g., strategy or coding-related games).

11. Watching science fiction or tech-related movies/series.

12. Playing chess or solving puzzles.

Outdoor and Physical Activities

13. Hiking or nature walks.

14. Traveling and exploring new places.

15. Volunteering in community tech initiatives or workshops.

Personal Interests

16. Blogging or creating tutorials about web development.

17. Photography, especially capturing landscapes or cityscapes.

18. Cooking or trying out new recipes.

Would you like to expand on any of these or tailor them to a specific tone for your resume?
